	Lunch		12.00-13.00

Presentation and Discussion Guidelines

As has happened so successfully at previous TMN meetings, all TMN members attending the meeting are encouraged to present on their company's practices/ lessons learnt relating to the meeting topics.

One of the key issues in E&P technology management is "making better use of technology that has already been developed" (as opposed to inventing yet more stuff that might never be used fully). To that end, this TMN meeting will focus on **effective technology deployment**.

Each member will have approximately 45 minutes to present and discuss questions. Please come with some PowerPoint slides for your presentation. Based on the topic, please address the following areas in your presentation:

'Effective Technology Deployment'

- In terms of gain in value, how do you see the relative importance of technology development and technology deployment?
- How does your company divide effort/resource between technology development and technology deployment?
- How do you rate your company's capabilities in these areas?
- What makes a great 'deployer' of technology? (i.e. what does excellence look like?)
- What are the key components of successful technology deployment?
- In your experience, what are the main impediments to effective technology deployment?
- How does your company capture lessons learned from technology projects?

Map/ Directions

Parking:

There is no onsite parking. Validation stickers for the Regency Garage (garage for the Hyatt Regency) can be provided if required.

Accessing the building:

On arrival report to the security desk in the lobby of 1400 Smith St and pick up a visitors badge. Security will call Laura Murrell who will escort you to the meeting room.
